

Alexander Pavlovich

Digital products, AI & automation

dobropalm.tech · @dobropalm · hello@dobropalm.tech

APPROACH & RESPONSIBILITY

I own product logic, architectural decisions and the final outcome. I use AI tools in development. Open to client projects, partnerships and opportunities with a strong company.

Since 2022: crypto and developing a channel covering activities. Since 2023: also AI. These interests have grown into my own applications and services.

SELECTED PRODUCTS

DOBROPALM Agent

An AI team across Telegram, browser and iPhone. Shared history, voice, scoped memory and action approvals. My role: role logic, architecture and outcome ownership.

AirChat

Messaging without a phone number: seed identity and encrypted sync. My role: account logic, recovery journeys and trust boundaries.

KOM17

My Telegram product: first a monolith, then a modular system. Cutover to a single FastAPI / aiogram 3 path completed on 26 May 2026.

DeLabs

Research service: 536 briefs, 181 guides and 315 profiles as of 24 September 2026. Search, sources and editorial revisions.

VahtaHoz

Warehouse and tasks for rotational crews. Offline workflows and separate stable/beta release channels.

WHAT WE CAN BUILD

AI assistants and Telegram platforms · web services and apps · products around data and content · evolving existing systems.
